

JULY, 1913.

SPECIAL PRICE LISTOF..... Selected Seed Potatoes

...FROM...
ANDERSON & CO., LTD.,

Seedsman and Plant Merchants : SYDNEY, Australia

Our Selected Stocks of SEED Potatoes

Are as usual in most excellent condition; they are all carefully picked, and are of a nice even seed size, the samples being dry and clean.

THE TUBERS this year are all on the large side, and entail a good deal of classing at considerable cost. We have priced our List as low as possible consistent with quality. The Prices of Seed Potatoes fluctuate a good deal during the Season, but we shall keep to those now given as near as possible. In the event of any variety ordered being sold out, **we will substitute** with another equally good sort unless otherwise instructed.

Anderson & Co., Limited.

Special Quotation for Half or One Ton lots.

Anderson's Selected "Early Rose."

This is perhaps one of the very best known Potatoes. We have, as usual, a fine stock in prime condition; tubers being clean, and free from disease; a really excellent sample. Early Rose produces a good crop, and is a great favorite.

ANDERSON'S SELECTED "EARLY ROSE."

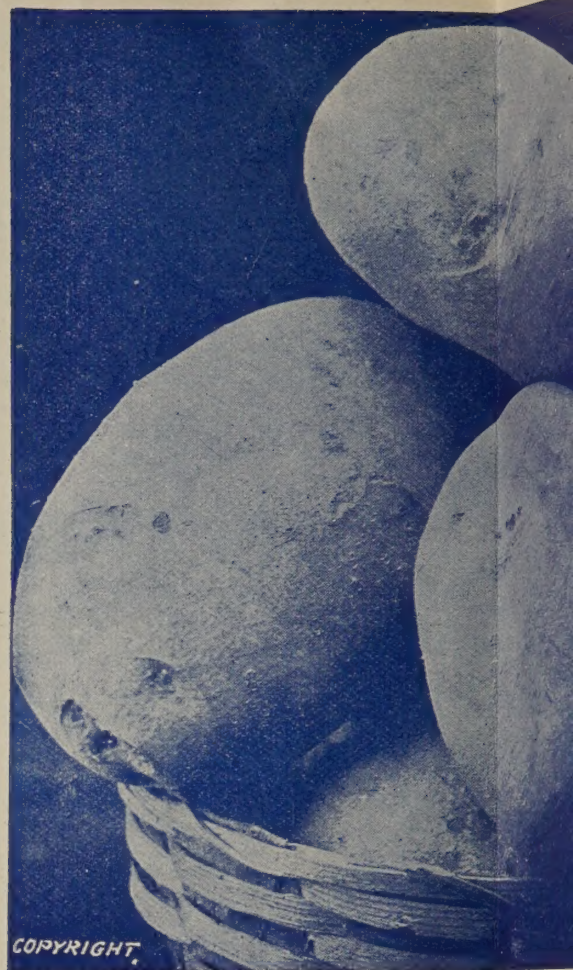

ANDERSONS "BROWNELL'S BEAUTY."

Mogilla, 4/11/1912.

"When I was in Sydney in July I purchased from you some Seed Potatoes and some Seed Corn, and was very pleased with the quality of same, and as a result I am sending for some more."

G. ALCOCK.

ANDERSON'S "SATISFACTION"

SPECIAL PRICES FOR LARGE LOTS ON APPLICATION.

GENERAL DESCRIPTION.

PRICES.

Per Cwt. Per 28 lbs. Per 14 lbs.

Brownell's Beauty

A main crop variety that is universally grown; it is a great favourite, a sure cropper, and a splendid market potato and a fine table variety. Our stock is in fine condition.

14/- 3/9 2/-

Snowflake

One of the very best white skinned potatoes grown; it is really first-class in every respect; a very favourite table potato, boils white and mealy, and a variety that yields and keeps well, and should be grown by every farmer to some extent.

14/- 3/9 2/-

Extra Early Vermont

A red skinned potato of the Early Rose type, very prolific, and producing large tubers; the crop is heavy, particularly in the warmer districts, and the quality is good; matures very early.

15/- 4/- 2/6

Anderson's "Southern Star"

Our supply of this grand potato is very short this season; it produces tubers which are very uniform in size; it is first-class, gives a splendid crop, and boils and keeps well; has a lovely pale pink skin, with a dark eye.

16/- 4/6 3/-

Bresee's Peerless

This white skinned potato is a favourite in some districts on account of the crop it gives, but in rich land the tubers grow to a large size; a good keeping variety, and boils well.

14/- 3/9 2/-

Irish Flounder

This potato has been grown from imported stock; it has somewhat changed from the true type, growing a little round, but it retains all its good flavour; it crops well, and suits heavy land; white skin.

13/- 3/9 2/-

Holmleigh, Walcha, 8/2/1913.

"I have again been very successful with an early crop of Southern Star Potatoes. This is the variety I got first from you several years ago when a novelty. I find it suitable to this district. Last year I had a good yield from the seed purchased from you then. It has proved a fairly heavy cropper, good quality, and an early maturing variety."

F. B. FLEMING.

Huntingdon P.O., 4/3/1912.

"I am more than pleased with the Seed Potatoes recently supplied."

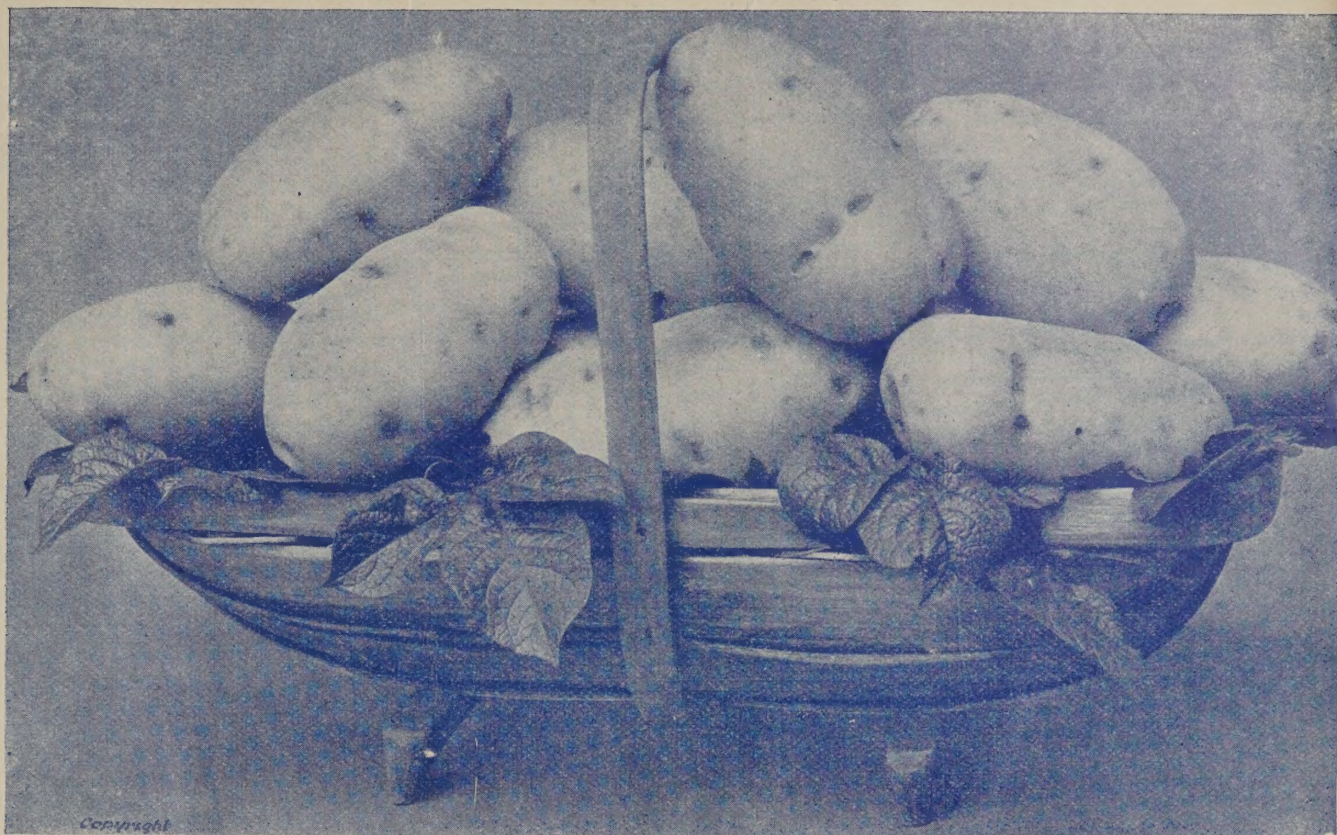

H. CAMERON.

Dingo Creek, 20/2/1912.

"The last Seed Potatoes I got from you were the best Potatoes I ever received from Sydney."

J. T. BIRD.

ANDERSON & CO., LTD., Seedsmen and Plant Merchants, SYDNEY.

ANDERSON'S "SNOWFLAKE."

Gloucester, 10/1/1912:

"I procured some Anderson's Satisfaction Seed Potatoes from your firm some time ago, and can safely say that I have never grown a potato to equal them, both in quality and also for keeping; they gave 'Satisfaction' in both ways."

G. J. ROBINSON.

TISFACTION."

GENERAL DESCRIPTION.

PRICES.

Per Cwt. Per 28 lbs. Per 14 lbs.

Anderson's Satisfaction

This grand potato was named and introduced by our firm; it is a heavy cropper, generally grows a nice even size, rich brown skin; a fine table potato, and now a leading and standard variety; excellent in every respect.

14/- 3/9 2/-

Cambridge Kidney

This is a second early kidney, but of most excellent flavour, and can always be depended on for a good crop; it keeps well, and is a fine potato for private growers.

15/- 4/- 2/6

Manhattan

A well-known dark skinned potato, suitable for main crop; it produces heavy crops, and on rich land tubers of a large size, which keep well; a very hardy variety and excellent table potato.

14/- 3/9 2/-

Anderson's Country Boy

This is another of our own selection, named and sent out by us some years ago; the supply this season is small; a fine round potato, indeed an ideal shape, with fine red roughish skin; not a coarse growing variety, and an excellent table potato, and highly recommended.

16/- 4/6 3/-

Anderson's Royalty

This is a kidney shaped potato, with a clear white skin, and is a fine table variety; it is a heavy cropper, and fine for private use; we think it one of the very best white skinned potatoes listed.

14/- 3/9 2/-

Magnum Bonum

A late variety of excellent quality, and has the reputation of being disease-resisting; long oval shape, and keeps well.

14/- 3/9 2/-

Alpine Wonder

This is the frost-resisting potato; we first listed it in 1910, and in some districts it has done remarkably well; clients have spoken very highly of it; it is a heavy cropper, with pink skin, and not unlike Early Rose, sometimes growing to a large size, and producing good crops when other varieties have been killed by frost.

9d. 9/-
per lb. 14 lbs.

Upper McDonald,
28/4/1912.

"We have a lovely bed of frost-resisting potatoes—'Alpine Wonder'—from your seed, the best we have grown for years, the potatoes being large and clean."

W. BAILEY.

Littlemore Station, via Gladstone (Q.),
22/3/1912.

"The Emperor and Cambridge Kidney Potatoes you sent me were lovely seed; they are the best potatoes grown about, and I have advertised them here, and I hope you will have a good many orders from this part in the Spring."

W. HAMMOND.

Spray your Potatoes

AND

Prevent Irish Blight.

IRISH BLIGHT is a Fungoid Disease. The plant is attacked, and the spores may be blown considerable distances. The **only** safety is the **persistent spraying** of the plants, and the best mixture is "BORDEAUX"

"Bordeaux" Powder

is the recognised remedy for all fungus pests, and has been proved most effective. We have a large supply all ready prepared, which can be mixed with water straight away, saving much time and trouble.

1 lb.	7d.
10 lbs.	5/-
28 lbs.	12/6
56 lbs.	22/6
1 cwt.	45/-

Each pound weight of this Bordeaux Powder will make 5 galls. wash.

The "Eclair" Spray Pump

(Knapsack.)

A most effective machine for limited areas of potatoes, and by using the double nozzle (see illustration) the underside of foliage can be as easily sprayed as the top, and two rows can be done at once.

Price of "Eclair" Spray Pump, 50/- packed.

Delivered Free on Rail, Sydney.

Double Nozzles, 4/6. Extra length of Brass Tubing, 2/3.

The "Austral" Auto-Spray

(REGISTERED).

ANDERSON & CO., LTD.,

Sole Distributing Agents.

This Spraying Machine is entirely automatic in its action. It presents a number of important advantages which make it absolutely the most up-to-date.

IT IS SIMPLICITY ITSELF—no pump to give trouble, no intricate parts which require skill in handling; it cannot get out of repair. The Powders we supply produce their own gas under pressure, so there is a great economy of material. At the same time the Spray is very fine and adhesive. The machine is ready for use at a moment's notice. It can be carried very comfortably on the shoulders, the arrangement for this purpose being so perfect that a woman can use the spray without becoming tired.

PRICES OF MACHINES:

No. 1, 1½ gallons	£2 10s. 0d.
(Weight, when full, 25 lbs.)	
No. 3, 2½ gallons	£3 12s. 6d.
(Weight, when full, 47 lbs.)	

PRICES OF POWDERS.—With Copper Sulphate (Bordeaux), for No. 1 Machine, 4/- per doz., 8/- for 25, 30/- per 100; for No. 3 Machine, 7/6 per doz., 15/- for 25, 50/- per 100. Without Copper Sulphate (simple), for No. 1 Machine, 3/6 per doz., 7/- for 25, 25/- per 100; for No. 3 Machine, 6/6 per doz., 13/- for 25, 45/- per 100.

Special Leaflet with fullest details on application.

Spray your Fruit Trees

... IN ...

JULY AND AUGUST

AND USE

"HARBAS"

IT IS

THE BEST SPRAY OIL

FOR THE PURPOSE.

"HARBAS" is a **sure remedy** for San Jose Scale, Woolly Aphis, Brown Scale, Red Scale, Cushion Scale, Black Scale, and all Scale Pests that attack various Fruit Trees.

READ THE FOLLOWING TESTIMONIALS:

ANDERSON & CO., LTD.

"I must say 'Harbas' is the very best spray oil that has been invented yet. Last summer fruit was very clean from scale pests; I lay it to the 'Harbas' Spray. I wish to thank you very much for letting me know about the 'Harbas' Spray Oil; you can send me four gallons of it with all instructions about it."

S. HOSKISSON, Senr.

Clarendon, 23rd April, 1913.

Nelson, via Cairns, Queensland,

11th June, 1913.

To ANDERSON & CO., LTD.

"Last year I used some of your 'Harbas' Spray Oil with satisfactory results. I sprayed several citrus trees that were terribly affected with different scale pests; a few days after spraying, the scale began to fall off, and a week later the trees began to send out young shoots, as if renewed to life again. So pleased am I with the results of 'Harbas' that I am now ordering another supply for this winter."

Yours truly,

(Signed) GEORGE PARRY.

Instructions for Use.

FOR CITRUS TREES.—1 part of "Harbas" to 30 parts of cold water. No Emulsifying necessary—it does all that itself; you are sure of an even distribution of the Oil.

FOR OTHER FRUIT TREES.—1 part of "Harbas" to 20 parts of cold water. San Jose Scale, Woolly Aphis, and other Scale Pests soon disappear after applying "HARBAS."

FOR ROSE TREES.—As a Winter Spray use 1 part of "Harbas" to 50 parts of Water. It gives Health and Strength to the Roses.

SPRAY CABBAGES WITH "HARBAS" for Cabbage Fly and Aphis, 1 part "Harbas" to 50 parts of Water.

KEEP THE FRUIT TREES HEALTHY AND THUS ENSURE GOOD CROPS.
